

Quiz NO 2

2.3
3

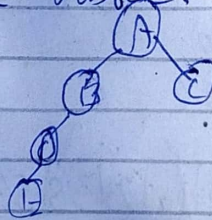

NAME: Muhammad Usman
Roll NO: FC-175 Ims: 218
Class: BSCS-4th semester
Subject: DAA

Question NO 2

Linear search:

Sequential search is the type of algorithm search. In this search the user are not bounded that to search layer by layer. It is also not compulsory that every parent have two childs.
Problem.

- * In this search it will take max time consumed
- * It ~~is~~ cannot follow the pattern like binary search here.
- * Much time wasted.

Search Result: A, B, C, D, E

Binary Search:

This type of search is the ~~linear~~ and important these linear search. In this search the user are bounded to use this search layer by layer. It is
